

I am an avid listener to the radio station Airl and it has come to my attention that new legislation could cause many local FM radio stations to be kicked off the air and be replaced by LPFM stations. I am writing to say that I support the current way things are run and feel that adopting this new legislation would be detrimental both to my community and myself personally. Airl serves me personally by offering music that is clean and positive with no commercials, something that few other radio stations can say. I know that when I listen to Airl, only what I want to hear will be played and I do not need to worry about profanity or other such negative lyrics that all too many songs have these days.

Additionally, Airl as a Christian radio station allows me to worship God throughout the day and be reminded of his presence in my life. As a Christian, I value this greatly and would worry that if this legislation passes that my local station could be replaced.

Worship is an important part of my life and as part of my right to freedom of religion Airl helps me to be reminded of my commitment to God throughout the day and in situations where it might be hard for me to do so otherwise. Airl provides support to both myself and my community by providing prayer service and positive uplifting music that cannot be found on most stations. If Airl were replaced by an LPFM station, I feel that the effect would be detrimental both to myself and those who live near me as we would no longer have Airl as an option for our choice of music and also because the services that Airl provides helps communities across the US. Their wall of prayer for our troops, prayer service for any listener, and also their support of rescue missions for the homeless and missions funding for other countries would be seriously jeopardized should they lose their radio stations and not be able to receive the support from their listeners. Not only for myself, but for those in my community as well, Airl serves us and it is in the public interest to keep the radio stations the way they are and not allow those who have helped our community be kicked off the air. Thank you for considering my position and I hope that this new legislation is not implemented in any way.
